1 SPX SILENCED EXHAUST SYSTEM SET**GTX GT2**

The exhaust system is only available for the KTM X-BOW GT2. It has a catalytic converter and a silencer to meet any necessary noise restrictions. The Set is mandatory for some series and race tracks. It is part of the SPX kit.

SET NR.:
X2805050001 SPX silenced exhaust system

**2 SHORT FINAL DRIVE****GTX GT2**

Shorter ratios on the sequential transmission, providing quicker acceleration in return for a lower top speed.

PART NR.:
X2633951044

3 LONG FINAL DRIVE**GTX GT2**

Longer ratios on the sequential transmission, raising top speed (~300 kph) in return for slower acceleration

PART NR.:
X2633953044

**4 GT2 OIL PAN SET****GTX GT2**

With its larger cooling volume and optimized ribbed cooling surface, this high-performance oil pan for the KTM X-BOW GTX guarantees stable oil pressure and higher cooling performance – particularly during high-speed corners with high G forces. The KTM X-BOW GT2 is equipped with it as standard.

SET NR.:
X2830005044

5 COOLANT SWITCH 70DEGC

GTX GT2

This coolant switch is specially designed for the high temperatures on the race track. It activates when the engine temperature reaches 70 °C. The thermostat is particularly useful to keep engine temperatures in an optimal range during on-track racing, where the engine temperature can rise quickly. It also helps to reduce transmission and engine oil temperatures, an added benefit in endurance racing. The thermostat can also help to maximize engine performance and durability. All models manufactured from 2022 onwards are equipped with this coolant regulator as standard.

PART NR.:
X2830010030

6 BELT PROTECTOR SET

GTX GT2 GT-XR

The belt protector set offers reliable timing belt and fan belt protection in racing conditions. It has been designed especially to prevent dirt and foreign bodies such as gravel entering the belts. The part, made from highly resistant carbon, forms a robust cover over the belts to protect them from damage and increased wear and extend the car's life span even in racing conditions. To ensure proper functionality, it is recommended that the modification be carried out by a certified KTM specialist dealer.

SET NR.:
X3030923044 Set Belt Protector for GT-XR
X2630023044 Set Belt Protector for GTX/GT2

7 GT2 FRONT AXLE BRAKE SET

GTX GT2

The sturdier brake system successfully used on the front axle of the KTM X-BOW GT2 has two thicker brake disks. The larger volume allows greater braking energy to be absorbed, lengthening the operating time of the brake system on the KTM X-BOW GTX.

SET NR.:

X2613967044	Complete Set
X2813R60001	GT2 front axle brake set right
X2813L60001	GT2 front axle brake set left

8 ADDITIONAL SNORKEL FOR BRAKE COOLING

GTX GT2

This aerodynamic feature can be fitted to optimise cooling to the front axle and enhance the performance of the car. It directs cooling ambient air directly to the brake systems. The set can also be equipped with a snorkel kit for each side.

SET NR.:

X2813L66044	Additional snorkel for brake cooling left
X2813R66044	Additional snorkel for brake cooling right

9 BRAKE SYSTEM CONVERSION SET

GT-XR

Brakes can be upgraded using these PowerParts regardless of whether the car was fitted with steel brakes or the performance ceramic brakes by the factory. Both brake systems are compatible with five-lug and the centerlock rims.

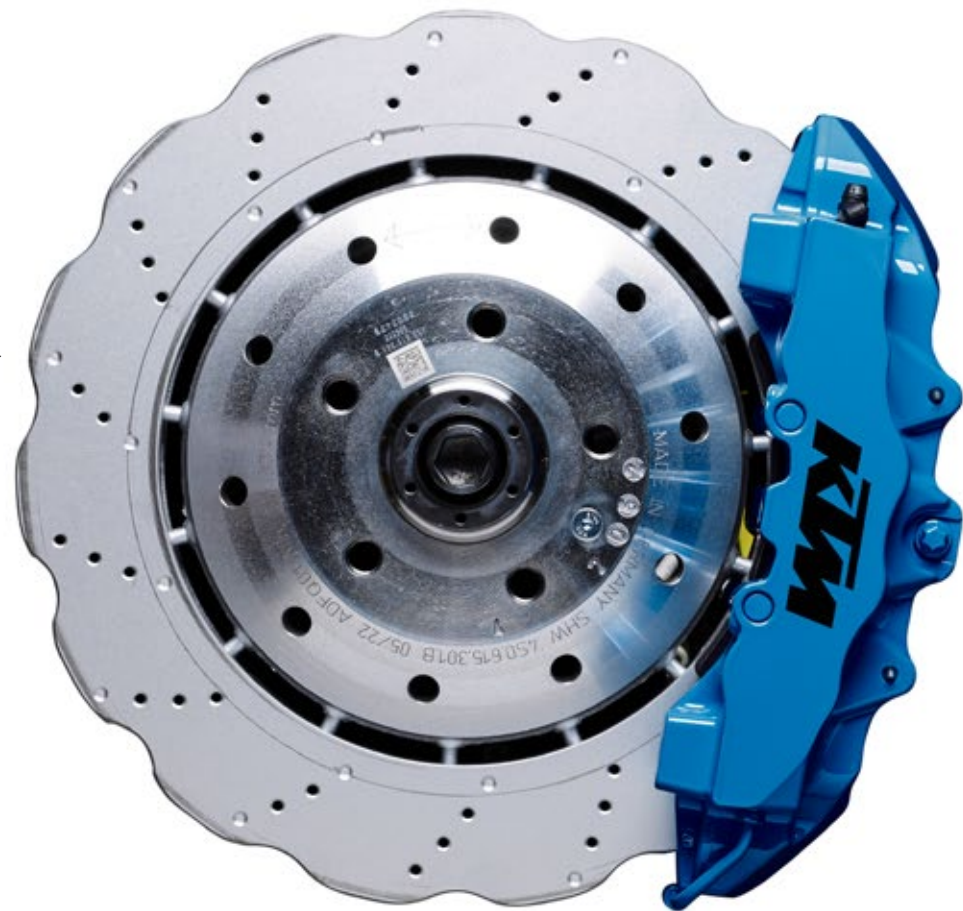

The high-performance steel brakes, each with two eight-piston calipers on the front axle and two four-piston calipers at the rear, deliver outstanding stopping power and precision braking while offering high heat resistance. The performance ceramic brakes have been developed especially for extreme conditions, and are a cut above the steel brakes when it comes to braking performance. They have carbon-reinforced ceramic brake disks with higher heat resistance and longer life spans and feature two six-piston calipers on the front axle and two four-piston calipers at the rear. They are designed for optimum braking under extreme conditions, help to reduce the car's weight and deliver impressive deceleration and stability for ultimate car performance.

All brakes include black calipers with an orange KTM logo as standard. Customers can customize their appearance by selecting a color of their choice for the calipers.

SET NR.:

X3013910044 Set Conversion from steel brake system to ceramic brake system (5-lug wheel hub)

X3013911044 Set Conversion from steel brake system to ceramic brake system (centerlock wheel hub)

10 CENTERLOCK COVNERION SET

GT-XR

The centerlock set allows the KTM X-BOW GT-XR to be converted from five-lug rims to centerlock rims. The centerlock system offers numerous advantages in motorsport and during track days, as the wheels can be changed more quickly and efficiently. The set includes all of the necessary components to convert the rims. Customers are advised to have the rims converted by a certified KTM specialist dealer. With centerlock rims, wheels can be loosened and tightened more quickly, saving timing during pit stops.

SET NR.:

X3070910044 Set Conversion from 5-lug wheel hub to centerlock wheel hub (steel brake system)

X3070911044 Set Conversion from 5-lug wheel hub to centerlock wheel hub (ceramic brake system)

11 CENTERLOCK UPGRADE KIT

GTX GT2

This upgrade kit allows the standard five-nut wheels on the KTM X-BOW GTX to be upgraded to the centerlock system. The centerlock system allows fast tire changes during races for optimal pit stops.

SET NR.:
X2670950044

**12 CAP 5-LUG RIM KTM**

GT-XR

The cap, developed especial for 5-lug rims with their Y-spoke design, gives the KTM X-BOW GT-XR that personal touch. The KTM logo can be applied to the decorative surface with a carbon backdrop, either with a powerful black finish, in fluorescent orange or in any color of the customer's choosing. This cap can only be used with 5-lug rims. The minimum order quantity for the 5-lug rim KTM Individual cap is eight items. Four caps are required per wheelset.

PART NR.:

X3009015011 Cap 5-lug rim KTM orange (1x)

X3009015012 Cap 5-lug rim KTM black (1x)

X3009015012NI Cap 5-lug rim KTM individual (1x)

13 GTX RIM
GTX

The rims on the KTM X-BOW GTX are available in two colors for 5-lug models – graphite (matte) and black (glossy). The rims are 11" on the front axle and 12.5" at the rear. To use centerlock rims, the PowerPart "Centerlock Wheel Upgrade Kit" is required.

PART NR.:

X260901000123	Rim GTX VA graphite 5-lug 11 x 18
X261001000123	Rim GTX HA graphite 5-lug 12.5 x 18
X2609010001C1	Rim GTX VA black 5-lug 11 x 18
X2610010001C1	Rim GTX HA black 5-lug 12.5 x 18
X1209010001	Rim GTX VA black ZV 11 x 18
X2610910001C1	Rim GTX HA black ZV 12.5 x 18

14 GT2 RIM
GTX GT2

Two additional centerlock rims in GT2 design are available for the GT2 and GTX models. One is a glossy black cast rim. Alternatively, a forged rim is also available. The latter is offered in both glossy black and matt graphite. The PowerPart "Centerlock Wheel Upgrade Kit" is required for the KTM X-BOW GTX model.

PART NR.:

X2809010001C1	GT2 rim VA 11 x 18 black
X2810010001C1	GT2 rim HA 12.5 x 18 black
X280901000123	GT2 rim VA 11 x 18 graphite
X281001000123	GT2 rim HA 12.5 x 18 graphite matt

15 Y-SPOKE RIMS

GT-XR

The aluminum forged rims, specially developed for the 5-lug system of the KTM X-BOW GT-XR by Italian manufacturer OZ Racing, combine high performance with outstanding design. The Y-spoke rim meets the highest standards, featuring low weight and maximum mechanical resistance. The 19" rims on the front axle and 20" rims at the rear are available in Black Gloss, Star Graphite, Bronze Matt, Grigio Corsa Bright and Gold Gloss.

The PowerPart "Centerlock Conversion Kit" is required for the use of centerlock rims. Customers are advised to have the rims converted by a certified KTM specialist dealer.

PART NR.:

X300901510176	Y-Spoke rim 19 inch gold
X301001510176	Y-Spoke rim 20 inch gold
X3009015101H1	Y-Spoke rim 19 inch grey
X3010015101H1	Y-Spoke rim 20 inch grey
X3009015101M9	Y-Spoke rim 19 inch bronze
X3010015101M9	Y-Spoke rim 20 inch bronze
X300901510102	Y-Spoke rim 19 inch black
X301001510102	Y-Spoke rim 20 inch black
X3009015101T6	Y-Spoke rim 19 inch anthrazit
X3010015101T6	Y-Spoke rim 20 inch anthrazit

16 GT-XR CENTERLOCK WHEEL

GT-XR

With the high-end motorsport rims with CENTERLOCK mechanism made by OZ Racing, not a second is lost when changing rubber. Tires can be changed simply by loosening one lug in the center of the rim, rather than five separate nuts on conventional rims. The racing genes of the wheels in the X-BOW GT2 design are clear at first glance. Thanks to the impressive dimensions of 20" at the front axle and 21" at the rear, the X-BOW GT-XR appears rooted to the asphalt. The rim set is available in Black Gloss, Star Graphite, Bronze Matt, Grigio Corsa Bright and Gold Gloss. The PowerPart "Centerlock Conversion Kit" is required for the use of centerlock rims. Customers are advised to have the rims converted by a certified KTM specialist dealer.

PART NR.:

X300991500076	Centerlock rim 20 inch gold
X301091500076	Centerlock rim 21 inch gold
X3009915000H1	Centerlock rim 20 inch grey
X3010915000H1	Centerlock rim 21 inch grey
X3009915000M9	Centerlock rim 20 inch bronze
X3010915000M9	Centerlock rim 21 inch bronze
X300991500002	Centerlock rim 20 inch black
X301091500002	Centerlock rim 21 inch black
X3009915000T6	Centerlock rim 20 inch anthrazit
X3010915000T6	Centerlock rim 21 inch anthrazit

17 MICHELIN RAIN TIRES

GT-X GT-2

Michelin rain tires are available for driving in wet conditions.

PART NR.:

X2609078002 Rain tires VA 30/65 – 18**X2610078002** Rain tires HA 31/71 – 18**18 SET MICHELIN ALPINE 4 19/20"**

GT-XR

These high-performance winter tires are a guarantee for an unforgettable driving experience, even on winter roads. For optimal control, high precision and short braking distances on wet and even snow-covered surfaces.

PART NR.:

X3009078002 Alpine 4 235/35 R19**X3010078002** Alpine 4 295/35 R20**19 SET MICHELIN PILOT SPORT CUP 2 19/20"**

GT-XR

The MICHELIN Pilot Sport Cup 2 is a high-performance summer tire that is designed for the race track but also perfectly on the road. The tires, designed especially for challenging conditions, offers high steering precision, impressive grip and excellent durability. The tire was built to deliver high stability under extreme conditions.

PART NR.:

X3009978011 Pilot Sport Cup 2 235/35 ZR19**X3010978011** Pilot Sport Cup 2 295/35 ZR20**20 SET PIRELLI P ZERO TROFEO R 19/20"**

GT-XR

With semi-slick tires, drivers are perfectly equipped for any track day. The innovative ultra-low-profile tire with asymmetrical profile was specially designed for on-track driving on dry asphalt to maximize enjoyment behind the wheel and ensure absolute safety, even when the car is on the limit. It delivers precision steering movement and grip at the kind of temperatures occurring on the race track and guarantees sustained effectiveness at a low level of wear.

PART NR.:

X3009979011 P Zero Trofeo R 235/35 ZR19**X3010979011** P Zero Trofeo R 295/35 ZR20**21 SET MICHELIN PILOT SPORT 4 S**

GT-XR

The MICHELIN Pilot Sport 4 S is a high-quality summer tire providing sportscar drivers with excellent performance and optimum control even with worn profiles. This tire was designed to guarantee outstanding grip, steering precision and control even at high speeds, both on the road and for occasional use on the track.

PART NR.: 19/20 INCH

X3009078001 Pilot Sport 4 S 235/35 ZR19**X3010078001** Pilot Sport 4 S 295/35 ZR20

PART NR.: 20/21 INCH

X3009978001 Pilot Sport 4 S 235/30 ZR20**X3010978001** Pilot Sport 4 S 295/30 ZR21

23 SWORD-TYPE ANTI-ROLL BAR SET

GTX GT2

The sword-type anti-roll bar is an option to the standard 3-hole stabiliser. In comparison, this set offers the advantage of infinitely adjustable settings. It is fitted as standard in the GT2.

SET NR.:
X2870017000

The stabiliser has been revised with the model update. Customers who already own the sword-type anti-roll bar set have the option of upgrading to the anti-roll bar.

SET NR.:
X2870017144

**22 DAMPER PACKER SET**

GTX GT2

The set contains a myriad of variations of the damper packer, in a variety of thicknesses from 1 mm to 5 mm (open and closed). Varying the thickness can change the response sensitivity on the damper curve.

SET NR.:
X2670980044

**24 PERFORMANCE KINEMATIK**

GTX GT2

These components are used to set up the roll center, allowing the handling and stability of the car to be adapted to different track conditions. The adjustable brackets and reversing levers therefore enhance the kinematics of the entire chassis. To offer even more setting options, the tophats are available in lengths of 11 mm and 19 mm. The 11 mm tophats are a requirement in the GT2-regulations.

SET NR.:
X2670019044 Complete system performance kinematics
X2871019123 Tophats cone length 11 mm
X2871019122 Tophats cone length 19 mm

25 CAMBER SHIM

GTX GT2

The camber shims are available in a variety of thicknesses and allow the ride height to be adjusted at the front and rear axles. The camber shims are available in the following dimensions:

PART NR.:
X2670002050 Camber Shim FA 5 mm
X2670002020 Camber Shim FA 2 mm
X2670002010 Camber Shim FA 1 mm
X2670002005 Camber Shim FA 0.5 mm
X2671002050 Camber Shim RA 5 mm
X2671002020 Camber Shim RA 2 mm
X2671002010 Camber Shim RA 1 mm
X2671002005 Camber Shim RA 0.5 mm

26 SPX 5-POINT-ADJUSTABLE PERFORMANCE CHASSIS SET

GTX GT2

The high-performance chassis is the peak of chassis performance for KTM X-BOW drivers and engineers. The chassis, which features five points of adjustment, was developed and tested in race conditions at the Nordschleife. It is supplied ready to be fitted and with OEM-recommended Set-ups, and can be swapped in for the basic chassis with ease. The Set is part of the SPX kit.

SET NR.:
X2670910044

27 SPX SPRING PACKAGE

GTX GT2

The accessory set consists of 16 chassis springs for the 5-point-adjustable chassis. It comes with four different types of springs, each with two softer and two harder stiffnesses to find the perfect set-up. On request, it can also be assembled according to the desired spring rates.

SET NR.:
X2670920044

28 DAMPER SENSOR SET FOR 5-POINT-ADJUSTABLE PERFORMANCE CHASSIS

GTX GT2

This damper sensor system, compatible with 5-point-adjustable chassis of the KTM X-BOW, provides all the important data for a track-specific vehicle set-up. The set includes all the sensors and mounting parts required for ease of installation. The MoTeC C125 Race Display is essential to use this damper sensor system. The required upgrade for the display is included in the complete set.

SET NR.:
X2675916044 Complete set 5-point-adjustable chassis
X2675914044 Spring deflection sensor 5-point-adjustable damper installation
X2611017033 Spring deflection sensor with plug
X2611015044 Spring deflection sensor mounting device

29 SET DÄMPFERSENSORIK

GTX GT2

Damper sensors provide teams and drivers with comprehensive data on the best vehicle set-ups for any given circuit. The set includes sensors for all four dampers. The sensors themselves comprise milled parts and corresponding sensor potentiometers. The fixture for proper assembly is also included. The MoTeC C125 race display is required for the damper sensor set. The corresponding upgrade is included in this set.

SET NR.:
X2611016044 Complete set standard dampers
X2611014044 Federwegsensor Montage
X2611017033 Federwegssensor mit Stecker
X2611015044 Einbauvorrichtung Federwegsensor

30 MAIN SPRING STANDARD SUSPENSION

GTX GT2

Fine-tuning the car to different circuits is a vital part of finding the right set-up. Different spring strengths are available for the front and rear axles for this purpose.

PART NR.:

X2670060008	Main spring (48) 80-157
X2670060009	Main spring (48) 90-157
X2670060010	Main spring (48) 100-157
X2670060012	Main spring (48) 120-157
X2670060014	Main spring (48) 140-157
X2670060016	Main spring (48) 160-157
X2670011005	Additional spring (48) 5-70
X2670011010	Intermediate spring plate D48

31 SUSPENSION SPRING INDIVIDUAL

GT-XR

This set allows the suspension springs on the KTM X-BOW GT-XR to be customized in one of many different colors. A variety of color combinations are available, or customers can pick any color of their choosing to add that extra special personal touch. It includes the suspension springs for the front and rear axle.

SET NR.:

X3070010001NI	Spring FA Individual
X3071010001NI	Spring RA Individual

32 CUSTOMIZED WRAP COMPLETE VEHICLE

A wide range of templates and designs are available for customers to create their own customized liveries. Customized wrapping is compatible with all three models. The illustrations below represent sample liveries.

PART NR.:
X2676905000

33 PROTECTIVE COATING
GTX GT2 GT-XR

The protective coating protects the paintwork from damage caused by stones and scratches. It is available in matte and glossy designs and a variety of different variations for all models.

The 200 µm thin protective coating, which is precisely laser-cut for an exact fit, is available in either a matt or glossy finish. If required, individual elements of the protective coating sets can also be ordered as spare parts via spare parts catalogue.

- PART NR.:
- | | |

34 SUN PROTECTION FILM
GTX GT2 GT-XR*

The protective film not only reduces the amount of heat entering the car, keeps drivers and passengers cool even on hot days, it also gives the KTM X-BOW GT-XR an even sportier look. The tinted special film is applied to the inner side of the windscreen to protect the inside of the car from UV radiation and dazzling sunlight.

RACING

FULL FRONT

GT-XR WING

GT2 WING

TRUNK

35 CMS FENDER BRACKET SET
GTX GT2

Alternative position for the rear-view camera. The elevated position gives you a better view of the sides of the car.

SET NR.:
X2608951044

36 GT2 MIRROR SET
GTX GT2 GT-XR*

This set includes physical wing mirrors with housing that allows the CMS cameras to be fitted higher up, improving overall visibility. Two different designs are offered: in the GT2 standard design, the mirrors are unpainted, but they are also available in a matte or glossy finish too. Wing mirrors are required to meet GT2 regulations. These mirrors and raised positioning of the CMS are for racetrack use only. The raised position of the CMS system is not permitted on the KTM X-BOW GT-XR.

SET NR.:
X2874051044 GT2 mirror set
X2874051044NA GT2 mirror set CFK Clear matt
X2874051044NB GT2 mirror set CFK Clear glossy

37 REAR-WING GURNEY SET

GTX GT2

This Gurney flap was specially designed for the rear wing of the KTM X-BOW GT2. It changes the aerodynamic flow and provides more downforce, generating more grip from track surface as a result.

SET NR.:
X2808968044

38 FRONT GURNEY SET

GTX GT2

Adding the Front Gurney Set to the KTM X-BOW GTX and GT2 helps improve aerodynamics and increase front-end downforce.

SET NR.:
X2673924044

39 SPX FRONT AXLE INNER FENDER SET

GTX GT2

This optimized wheel arch Set is required to make space for the larger wheels in the SPX class. The wheels allow a special compound of tire to be fitted that enables significantly quicker lap times. The upgrade also affects neighboring parts. The Set is part of the SPX kit.

SET NR.:
X2608910044

40 SPX DOUBLE FRONT SPLITTER SET (INCLUDING LIGHT BOX, SKID BLOCKS)

GTX GT2

The heavily aerodynamically optimized front splitter provides significantly more downforce at the front end of the KTM X-BOW GT2 and GTX. The Set also contains skid blocks and a transparent, aerodynamically optimized cover for the optional endurance light system on the crash box, which minimizes undesirable air disturbance at the front of the car. The Set is part of the SPX kit.

SET NR.:
X2673923044

41 SPX DIVE PLATES SET

GTX GT2

The Set consists of two high-quality carbon dive plates, which can be fitted to the standard front ends of the KTM X-BOW GT2 and GTX to increase front downforce. The Set is part of the SPX kit.

SET NR.:
X2608941044

**42 SPX FRONT AXLE LOUVERS SET**

GTX GT2

The louvers can be fitted to the standard front end of the KTM X-BOW GT2 and GTX. The wheel-arch intakes guide ambient air to the brake system for efficient brake cooling. The upgrade increases downforce at the front end of the car. The Set is part of the SPX kit.

SET NR.:
X2608942044

**43 SPX DOUBLE WING SET**

GTX GT2

The double-element rear wing is optimized for maximum downforce and ensures that the rear end remains fixed to the circuit. The Set is recommended together with the aerodynamic louvers, dive plates and double front splitter components at the front end. It is part of the SPX kit.

SET NR.:
X2608967044

44 GT2 REAR WING SET
GTX GT2 GT-XR*

This rear wing set includes a GT2-spec spoiler, wing end plates on both sides and wing brackets. The wing, which has been specially designed to maximize rear-end grip, also features an adjustable wing angle to adapt car set-ups to different track conditions. Generating considerable downforce at high speeds, the powerful wing enhances the excellent rear-end stability of the KTM X-BOW GT-XR and also adds a visual highlight to the car, giving it a more aggressive appearance.

The rear wing is available unpainted for both the GT2 and GTX models, while a matt or gloss finish is available for the GT-XR model. Please note that the GT2 Rear Wing Set is not approved for road use and is only intended for racing.

It is not compatible with a third brake light or reversing camera.

- SET NR.:
X2808967044 GT2 rear wing set
X3008967044NA GT2 rear wing set matt
X3008967044NB GT2 rear wing set glossy

45 SKID BLOCK SET
GTX GT2 GT-XR*

The Skid Block Set protects the underbody and splitter of the KTM X-BOW GT-XR from damage on the race track. It helps extend the life span of sensitive components and reduce possible repair costs.

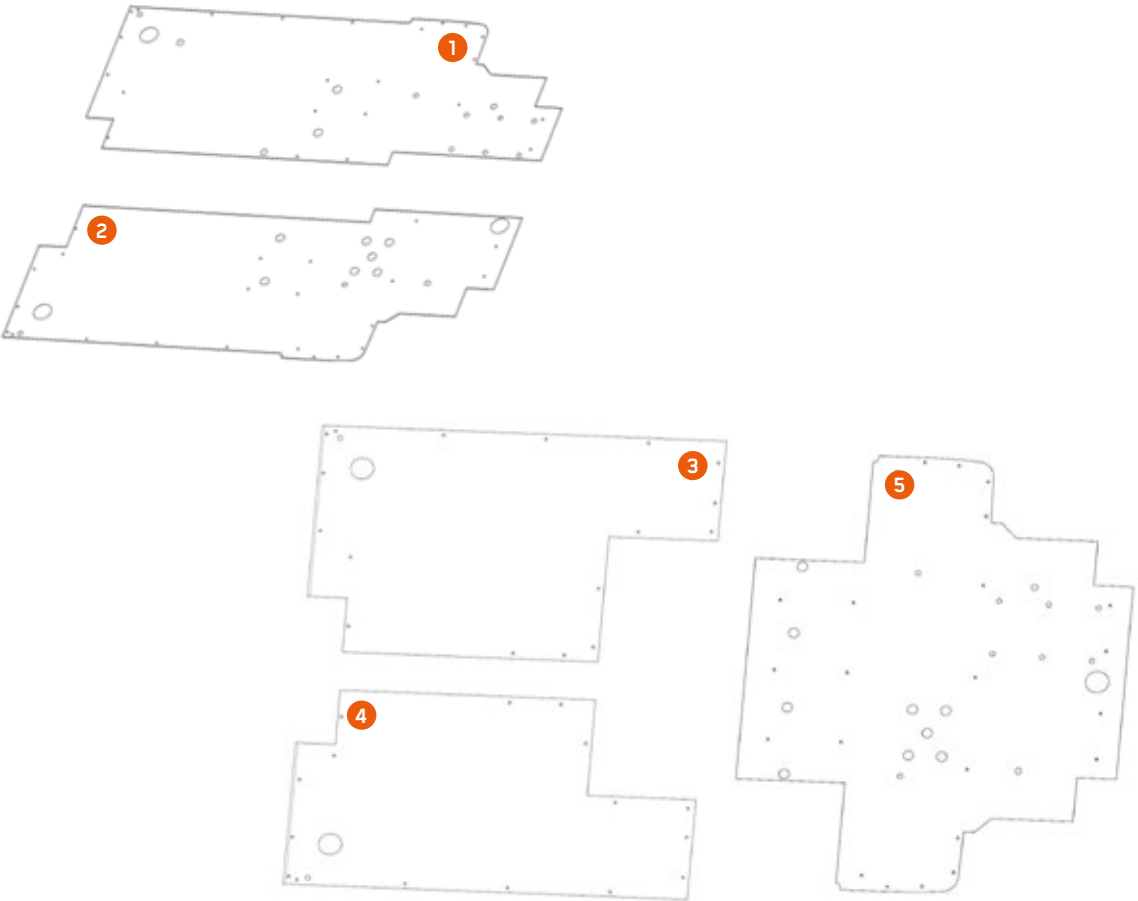

The wear-proof protective block made from highly resistant plastic has been specially developed to protect the car from damage when bottoming out. The Set includes three skid blocks that can be fitted to the underbody of the car. They are particularly resistant to wear and perfect for protecting the car in the long term.

- SET NR.:
X3073923010

46 UNDERBODIES
GTX GT2

These underbodies made from high-quality aluminum or steel were developed for KTM X-BOW GTX/GT2 owners who take part in racing series where the vehicle weight has to be increased under the regulations. The underbodies are available in a variety of weight classes and allow the vehicle weight to be adjusted depending on the regulations, all while keeping the car's center of gravity as low as possible. The layered design guarantees outstanding stability and durability. Its precision shape ensures that the underbodies can be fitted to the bottom of the car with ease.

- PART NR.:
X2673001110 Center underbody left "light" (1)
X2673001120 Center underbody right "light" (2)
X2873002031 Center underbody front „medium“ (+37,5kg) (5)
X2873001011 Center underbody left “medium & heavy” (+85kg) (3)
X2873001021 Center underbody right “medium & heavy” (+85kg) (4)
X2873001031 Center underbody front „heavy“ (+85kg) (5)

47 ENDURANCE LIGHTING SET GTX GT2

The Endurance Lighting Set provides the best possible visibility for night-time driving. The Set consists of two cornering lights on the crash box and two lighting elements that can be installed to replace standard full- and half-beam headlights.

SET NR.:
X2814991044

48 SET TOWING LOOP GTX GT2 GT-XR*

A belt loop made from highly durable material that is fastened to the standard tow bar on the car. It is required in combination with endurance lights.

SET NR.:
X2603990044

49 GT2 DUAL-CHAMBER FIRE EXTINGUISHER SET GTX GT2

This fire extinguisher system helps minimize the damage in the worst-case scenario of a fire in the car. The system fights fire in two separate chambers, allowing flames in the engine bay and in the interior of the car to be extinguished separately.

SET NR.:
X2880010002

50 TRACKDAY PACKAGE GTX GT2

Tailor-made spares packages include all necessary wear and maintenance parts for various areas of application at discounted conditions. The packages are available for 5-lug and center lock wheels.

SET NR.:
 X2612950044 Trackdaypackage (GTX 5-lug)
 X2612951044 Trackdaypackage (GTX centerlock)
 X2812950044 Trackdaypackage (GT2 centerlock)
 X2612952044 Starterpackage small (GTX 5-lug)
 X2612953044 Starterpackage small (GTX centerlock)
 X2812952044 Starterpackage small (GT2 centerlock)
 X2612954044 Starterpackage large (GTX 5-lug)
 X2612955044 Starterpackage large (GTX centerlock)
 X2812954044 Starterpackage large (GT2 centerlock)

51 WINDSCREEN TEAR-OFF
GTX GT2

To ensure a clear view at all times, this four-layer tear-off film is attached to the windscreen. The films can be easily removed one by one during a pit stop. They also protect the windscreen from impact damage.

PART NR.:
X2674902010

52 STEERING WHEEL HOLDER
GTX GT2

The steering wheel holder is a simple way of attaching and storing the steering wheel, allowing drivers to enter and exit the vehicle in comfort. The holder consists of a black anodized CNC milled component and can be attached to the homologated cage on the KTM X-BOW GTX and GT4 as preferred.

SET NR.:
X2677974044

53 COMPETITION SEAT
GTX GT2

This carbon seat is available to be able to accommodate a passenger when driving. The seat is a mirror image of the driver's seat and offers optimum passenger safety. The lightest sports seat in the range is a mirror image to the driver's seat and offers maximum passenger safety and lateral support.

SET NR.:
X2679022044 Competition seat driver
X2679R22000 Competition seat passenger

54 SEAT PADDING SET
GTX GT2

This special seat padding allows the seat shell to be adjusted to the height and build of the driver. It is designed for use with the Competition seat in the KTM X-BOW GTX on both the driver's and passenger's side. The padding is available in the sizes S and L.

SET NR.:
X2679001044 Seat padding set „S“
X2679002044 Seat padding set „L“

55 **ADVANCED GT2 SEAT +
SAFETY NETS**

GTX **GT2**

The Advanced seat is an FIA-homologated carbon bucket seat developed in cooperation with Recaro for the KTM X-BOW GTX and the KTM X-BOW GT2. In addition to the Competition seat, the Advanced seat has FIA-compliant safety nets on both sides, which are attached directly to the seat.

SET NR.:

- | | |
|--------------------|---------------------------------------|
| X2879022045 | Advanced seat |
| X2879L22004 | Safety net for
Advanced seat left |
| X2879R22004 | Safety net for
Advanced seat right |

56 **SET PASSENGER SEAT SHELL**

GTX **GT2** **GT-XR***

As an alternative to the Competition seat, it is also possible to equip the Monocoque passenger bucket seat with the three-part seat from the KTM X-BOW R and GT model. The seat is available in three sizes (S, M and L).

SET NR.:

X0008801044

57 SEATS CONTRAST STITCHING INDIVIDUAL
GT-XR

Whether it's to continue the customized exterior appearance of the KTM X-BOW GT-XR in the interior or add that special personal touch, the stitching on the seat padding can be ordered in any color variation of the customer's choosing.

Please note that the seams can only be carried out in a single colour.

- PART NR.:**
- | | |
|----------------------|--|
| X3079L01020NI | Seat padding shoulder left Individual |
| X3079R01020NI | Seat padding shoulder right individual |
| X3079001030NI | Seat padding back individual |
| X3079001040NI | Seat padding seat surface Individual |
| X3079001050NI | Seat padding headrest Individual |

58 SEATS LOCKSTITCH SEAM INDIVIDUAL
GT-XR

Anyone looking to give the puristic interior of the KTM X-BOW GT-XR some elegant, sporty accents can add high-quality decorative honeycomb stitching to the seat padding. The decorative and distinctive stitching design gives the padding a three-dimensional look with a tactile surface in any color the customer wishes to choose. The stitching on the passenger handle and the shifter cover also match the chosen design.

Please note that the seams can only be carried out in a single colour.

- PART NR.:**
- | | |

| X3079901040NI | Seat upholstery seat surface with quilting seam Individual |
| X3079901050NI | Seat upholstery headrest with quilting seam Individual |

59 ROOF LINER LOCKSTITCH SEAM
GT-XR

With this high-quality decorative honeycomb stitching, the custom design of the KTM X-BOW GT-XR can even be conveyed in the roof lining. The decorative and distinctive stitching design creates a 3D appearance with a tactile surface in any color the customer wishes.

This PowerPart is designed exclusively for a new KTM vehicle configuration.

60 RACING AIR CONDITIONING UNIT
GTX GT2

The intelligent air conditioning system in the KTM X-BOW GTX and GT2 ensures optimum cooling for the driver during intense racing sessions - without sacrificing performance. The push-button automatic air conditioning system is managed by the electronic control unit (ECU) in the car, providing ideal interior cooling with minimal loss of power under full throttle.

PART NR.:
X2678950044

61 EXTENDED CROTCH BELT
GTX GT2

The car is equipped with a 6-point Schroth safety harness for the highest standards of driver safety. An extended crotch belt is available as an optional extra.

PART NR.:
X2679022002

62 INTERIOR SEAT RESTS
GTX GT2 GT-XR*

This Set, consisting of two self-adhesive foam seat rests, can be fitted inside the monocoque to increase driver comfort.

PART NR.:
XPP00000865

63 SOUND SYSTEM GT-XR

With the powerful sound system for the KTM X-BOW GT-XR, playing your favorite tunes through your smartphone is child's play. The system offers maximum audio quality and a clear but punchy sound. Designed by high-end car hi-fi manufacturer Audiotec Fischer, the system has two tweeters and mid-range speakers as well as a subwoofer for an unrivaled audio experience that is Made in Germany.

This PowerPart is designed exclusively for a new KTM vehicle configuration.

64 FUEL TEMPERATURE SET
GTX GT2

This engine upgrade Set measures the temperature of the fuel using a sensor. The Set consists of a sensor, a sealing ring and a corresponding t-junction. It is mandated in certain racing series' regulations.

SET NR.:
X2607950044

66 DOWNLOAD CABLE SET
GTX GT2

The download cable Set includes a variety of cables required for software-related work.

SET NR.:
X2611910044

68 BOOST PRESSURE THROTTLE VALVE SET
GTX GT2

Set to measure boost pressure in front and behind the throttle valve. Consists of a boost pressure sensor and associated accessories. In some series this Set is mandatory.

SET NR.:
X2843910044 Set boost pressure after throttle valve
X2643920044 Set boost pressure before throttle valve

70 EMOTAG LOGGING KIT GT2 SET
GT2

The GT2 EMOTAG logging kit consists of a GT2 logger, a bracket and accessories. In some series, this system is mandated in the regulations.

SET NR.:
X2875045044

72 ENDURANCE USB LOGGING UPGRADE SET
GTX GT2

The Endurance USB Logging upgrade Set can be used to record vehicle data in endurance racing for subsequent analysis. The Set is recommended in some series but isn't a requirement. Only compatible with the MoTeC C125 race display.

SET NR.:
X2875082044

65 AIR PRESSURE BEHIND AIR FILTER SET
GTX GT2

Set to measure air pressure behind the air filter, comprising a pressure sensor and associated accessories. In some series this Set is mandatory.

SET NR.:
X2643930044

67 TURBOCHARGER AIR TEMPERATURE SET
GTX GT2

Set to measure turbocharger air temperature. Consists of a temperature sensor and associated accessories. In some series this Set is mandatory.

SET NR.:
X2643940044

69 TMPS SYSTEM
GTX GT2

The tire pressure control system comprises a Set of tire valves and associated sensors as well as a control unit. It allows tire pressures to be monitored while driving. The system displays the current tire pressures inside the car. In addition, the tire pressure sensors also enable precise analysis of tire pressures and temperatures during a particular lap or stint

SET NR.:
X2875050044

71 AIM EVO5 LOGGING KIT SET
GTX GT2

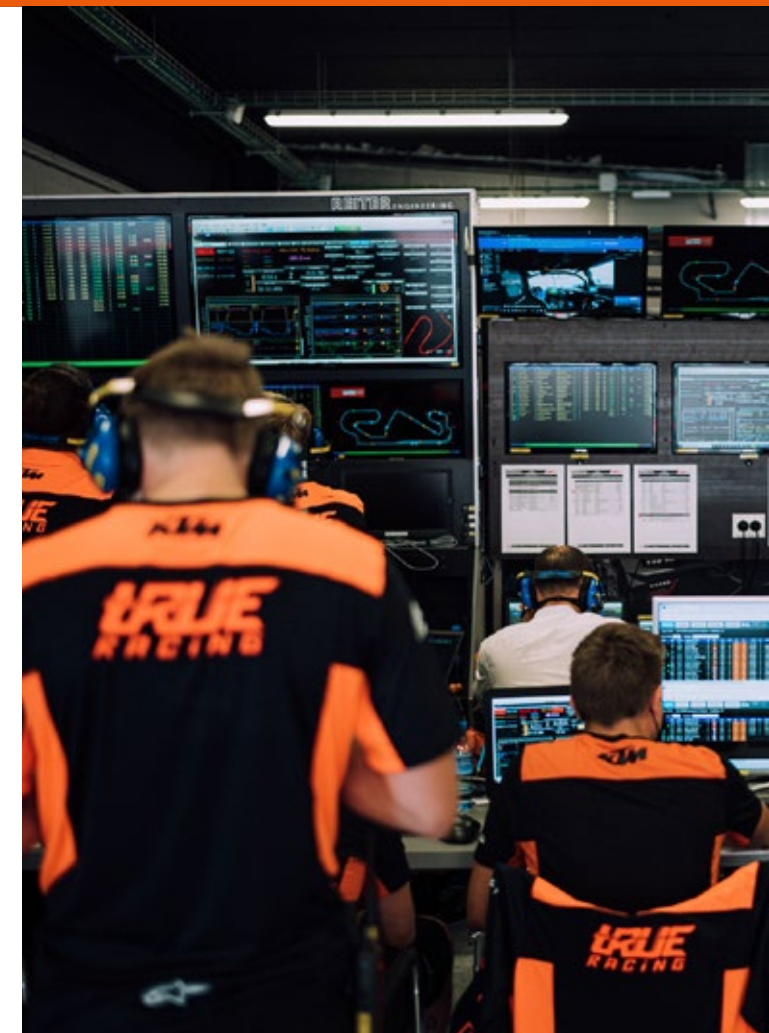

The AIM EVO 5 logging kit allows vehicle data to be recorded and analyzed. In some series, this system is mandatory according to the regulations.

SET NR.:
X2875083021

73 MOTEC TELEMETRY UPGRADE SET
GTX GT2

The MoTeC Telemetry upgrade Set with a TLM modem, SIM card and antenna enables real-time telemetry monitoring while the car is on track. The Set is mandatory for some series. Only compatible with the MoTeC C125 race display.

SET NR.:
X2875083044

74 REAR-VIEW CAMERA UPGRADE SET GTX GT2

The MoTeC C125 race display can be upgraded to include a rear-view camera for an even better view on the race track. The camera provides a continuous view behind the car – and is mandatory in some series. Only compatible with the MoTeC C125 race display.

SET NR.:
X2875081044

75 GTX LIFTING TOOL SET

GTX GT2 GT-XR*

The lifting system is recommended for easier servicing on the KTM X-BOW GTX. The Set consists of a jack stand for the front axle that supports the splitter and a lifting tool for the rear axle that, once the diffuser has been removed, raises the subframe.

SET NR.:
X2619990044

76 PELI KOFFER

This original protective case is a practical and safe means of storing the KTM download cable Set. This robust but light-weight case is the best way to protect and transport the cable set. The case is water-tight, shatterproof and dust-proof, is made from high-quality plastic and is equipped with a secure, easy-open, double lock system, ensuring that the cable set isn't damaged during transport.

PART NR.:
X2611910010

77 BATTERY CHARGER SET

GTX GT2

The battery charger and quick-charging adapter set is perfect for ensuring that the battery in the KTM X-BOW GTX/GT2 always has a sufficient charge level. The set is particularly worthwhile when carrying out work on the car while the main power has to be switched on.

PART NR.:
X2611057044

78 AIR LANCE WITH AIR TUBE AND ELBOW JOINT

GTX GT2

The pneumatic jack system on the KTM X-BOW GT4 and GTX/GT2 requires an air lance with a tube and an elbow component to lift the car using compressed air through the valve at the rear.

PART NR.:
X2619085010

79 TIRE TRANSPORTER TROLLEY

The tire transporter trolley is a steel frame that runs on rollers and enables two Sets of tires to be transported with ease. The tow bar allows the trolley to be connected to a vehicle, to transport tires to the pits or for refitting for example.

PART NR.:
X2619993044

80 VEHICLE COVER

GTX GT2 GT-XR

This high-quality, custom-made indoor vehicle cover guarantees the best possible protection for the car when parked. The cover is available in black with orange edging.

PART NR.:
X2612007010

81 BALLAST SET GT2

Under balance of performance regulations, the weight of the vehicle can be determined in various series. Weight is adjusted using ballast plates that are fastened to the car. Please note that the KTM X-BOW GT2 comes standard with the carbon box for securely mounting these additional weights. It is not included in this Set. The Set comprises one base plate and three different ballast plates:

- Base plate + 1 ballast plate: 3.5 kg
- Base plate + 2 ballast plates: 7.3 kg
- Base plate + 3 ballast plates: 10.8 kg

SET NR.:
X0175010044

82 WARM-UP ADAPTER SET

GTX GT2

The warm-up adapters can be used in place of normal tires in vehicle warm-up. The adapters are two light weights fitted to the rear axle using a normal wheel attachment – compatible with both center lock and 5-lug systems. The adapters apply enough weight to the driven wheel axle to cycle through the gears.

SET NR.:
X2619020044

83 TRACKING MEASUREMENT SET

GTX GT2 GT-XR*

Measuring and adjusting a car's tracking and camber values is a vital task both in the workshop and at the track. This Set consists of a linkage for the front and rear axle. It provides a simple means of measurement after a session or set-up change.

SET NR.:
X2619902044

84 CENTERLOCK NUT

GTX GT2

Socket for properly tightening and loosening the centerlock nuts with an impact wrench or torque wrench.

PART NR.:
X2819011025

85 DAMPER TOOL

GTX GT2

The set, which consists of a hook wrench and a special tool, is used to open and close the shock absorbers. It is recommended for set-up and service work on the chassis.

SET NR.:
X2619008044

86 AIR JACK SAFETY LOCK

GTX GT2

The air jack safety lock ensures that work can be carried out underneath the car safely. The system prevents the car from sinking down if the air jacks lose pressure. It contains three locking mechanisms that can be pushed through the support props on the air jack system.

PART NR.:
X2619085001 front air jack safety lock
X2619085002 back air jack safety lock

87 MOTEC C125 RACE DISPLAY SET GTX GT2

The MoTeC C125 race display is the basis for many more upgrade Sets for the KTM X-BOW GT4 and GTX. The race display comes with all of the necessary accessories, such as a modified wiring harness and a bracket. The basic Set is upgradable with components such as a rear-view camera, a MoTeC telemetry Set and much more besides.

SET NR.:
X2875080044

88 DOLLIES SET GTX GT2

The high quality KTM design dollies allow the cars to be manoeuvred with ease on heavy duty castors. This set consists of one dolly for the front axle and two dollies for the rear axle. The dollies are compatible with milling attachments for the standard air jack system on the car, which can also be removed if required.

SET NR.:
X2619992044

89 FUEL DISCHARGE SET GTX GT2

The fuel-drain Set allows fuel to be drained from cars in a controlled manner. This function is required in many different championships to take fuel samples for scrutineers. It's also recommended in motorsport to be able to determine exactly how much fuel is left in the car during the competition.

SET NR.:
X2607998044

90 KTM 3D LOGO EXTERIOR

GTX GT2 GT-XR

With the KTM 3D Logo Individual option, customers can adjust the KTM logos on the front and rear of the KTM X-BOW GT-XR however they like and give their car that extra special personal touch. Two variants are available: carbon and the classic plastic logo. The carbon logos offer a high-quality aesthetic and are available with matte and glossy finishes. The classic logo is available in any color.

PART NR.:
X0012010001NI KTM 3D Logo Individual Exterior
X3012010010NA KTM 3D Logo CFK Clear Matt
X3012010010NB KTM 3D Logo CFK Clear Glossy

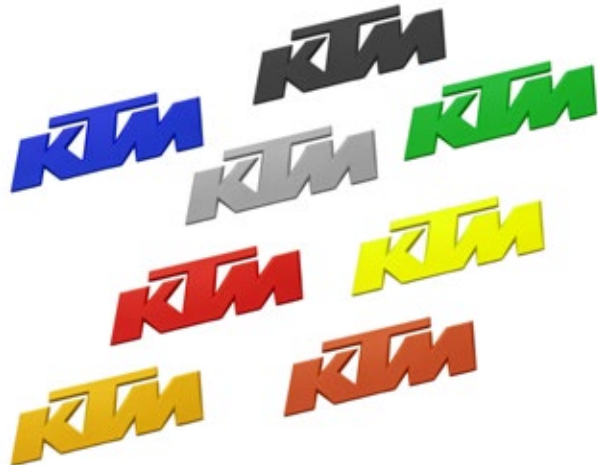

91 KTM 3D LOGO INTERIOR

GTX GT2 GT-XR

With the KTM 3D Logo Interior option, customers can adjust the KTM logos not only in the cockpit but also on the engine cover of the KTM X-BOW GT-XR however they want, just like the KTM 3D Logo Individual. The 3D logos are available in any color.

PART NR.:
X3012010001NI KTM 3D Logo Individual Interior
X0012010001NI KTM 3D Logo Individual Engine cover

92 QUAD LOCK SMARTPHONE CASE

GT-XR

The Quad Lock smartphone case has a robust polycarbonate core and a shock-absorbing TPU outer shell that protects the device. It can be mechanically fixed to the quad-lock bracket in the KTM X-BOW GT-XR quickly and easily, keeping smartphones safe and free from vibrations for the entire journey. The quad-lock smartphone case is compatible with all modern smartphones and offers reliable protection against scratches, dents and other damage.

PART NR.:
X3012090099

93 TRANSPORT COVER SET

GTX GT2 GT-XR

The transport cover set offers effective protection during transportation. It guards the KTM X-BOW GT-XR from general damage, scratches and dirt. The set also includes protective covers for the steering wheel and seats, keeping the interior of the car free of stains and other damage. The set also includes rim protectors, which ensure that the rims remain safe and sound during transportation. Another feature of the transport cover are its resealable openings, allowing the cockpit and the tank filler to be accessed while the cover is on.

SET NR.:
X3012990044

94 SET LUGGAGE
GT-XR

The luggage, designed in collaboration with traditional manufacturer Meindl have been built to fit precisely in the 160 liter trunk. The set consists of a top bag and a base bag in the conventional carry-on size, as well as a small handbag. The bags are made with the highest quality organic leather from certified cattle, sourced from the Bavarian and Austrian Alps.
